Questionnaire Number........................................................................................................
Survey of Student Involvement in University Governance in Kenya

Dear Respondent,
This questionnaire is part of a CODESRIA funded research that is designed to gain a better understanding of student involvement in university governance in Kenya. Your contribution to this project is very important. You are in a unique position to provide information that will enable us to understand the nature, role and state of student involvement in university governance in Kenya and to draw appropriate conclusions and make fitting recommendations. By completing this survey you will help identify what may facilitate more democratic governance of our institutions of higher learning.

Though participation in this study is voluntary and one is at liberty to withdraw at any stage, you are strongly encouraged to participate because the study is for an educational purpose. The information you will provide will be kept confidential. Answers to all questions will be used only in combination with the responses from other participants and no names or any information that could be used to identify particular respondents will be employed in reporting the research findings. All surveys will be destroyed at the end of the study. The results will be disseminated through a publication available the public and other channels such as journals, seminars and workshops.

Request for further clarifications can be channeled through any of the following:

Instructions for Completing the Survey

I would appreciate if you could take some time to respond to the questions on the following pages of the questionnaire. Most questions require that you simply check the appropriate box for the response that most accurately represents your present work situation. Please use a pencil and ensure that your answer marks are heavy enough to distinguish them from any erased answer marks. The survey should take between 20 to 25 minutes to complete and you are encouraged to complete it all at once. Please answer the questions in order without skipping around. Be sure to read each question carefully.

A number of questions you are asked to respond to seem repetitious. Don’t worry about this. It is not a trick. Rather, it is a deliberate methodological safety net. That is, it will facilitate the researcher to assess the validity and reliability of the measures. The assessment of these two attributes is a methodological necessity whenever variables are measured using scales like is the case in this study.

There are no “right” or “wrong” answers to any of the questions. However, you should be as candid as possible and also ensure that responses to closely related questions are not contradictory.

I want to thank you in advance for your time and cooperation.
